

## Drilling down in a hierarchy in Web Intelligence

### Procedure

1. Start the transaction using the menu path or transaction code.

### Web Intelligence Rich Client

The screenshot shows the Web Intelligence Rich Client window titled 'Web Intelligence Rich Client - Sales Revenue Drillable Crosstab - [user - @100]'. The main area displays a report titled 'Sales Revenue' with a table showing sales revenue for various US states from 2004 to 2006. The table is as follows:

	2004	2005	2006
California	\$1,704,211	\$2,782,679	\$2,992,679
Colorado	\$448,302	\$768,390	\$843,584
DC	\$693,211	\$1,215,158	\$1,053,581
Florida	\$405,985	\$661,250	\$811,924
Illinois	\$737,914	\$1,150,659	\$1,134,085
Massachusetts	\$238,819	\$157,719	\$887,169
New York	\$1,667,696	\$2,763,503	\$3,151,022
Texas	\$2,199,677	\$3,732,889	\$4,185,098

The interface also includes a properties pane on the left with sections for General, Appearance, and Page content. The status bar at the bottom indicates 'Last Refresh Date: April 15, 2008 11:57:37 AM GMT-07:00' and 'Connected'.

2. Click **Drill**.

You can analyze the data in this document in Drill mode.

3. Press **[Enter]** to continue.

You can tell that you are now in Drill mode by two different means: firstly, hyperlinks appear under each of the items in the table. This means if you click these hyperlinks, you will begin drilling down at that level to more detailed information.

Secondly, the Drill button is pressed down, and a new image appears on the Report Editor toolbar. This is the Snapshot button, that allows you to make a copy of your analysis as you work in Drill mode.

Press **[Enter]** to continue.

4. Click the **California** link.
5. Click the **Dimension** drop-down list.

A new Dimension drop-down list based on the drilled down value appears at the top of the document zone.

You are going to use this drop-down list to drill across the same level of detail to other states in the Store hierarchy.

6. Click the **Texas** list item.
7. Click the **Dallas Sales Revenue in 2004** cell.

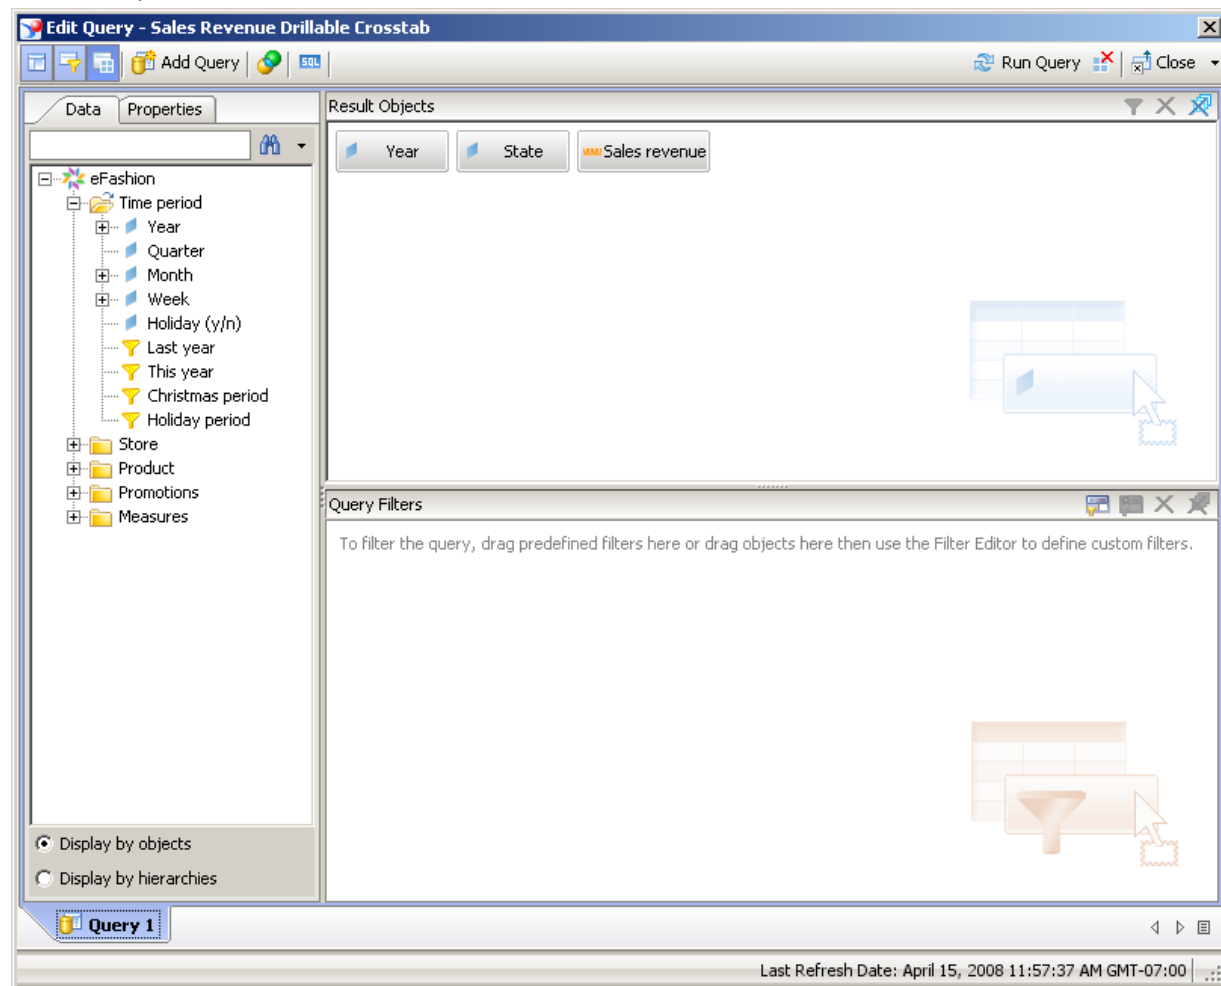

The crosstab displays data concerning the cities in the state of Texas.

You can drill down on two hierarchies at the same time, for example you can drill down to see sales revenue by quarter for Dallas in 2004.

8. Click **Edit Query**.

The sales revenue for the eFashion Dallas store is displayed at the Quarter level.

### Edit Query - Sales Revenue Drillable Crosstab

9. Click **Show/Hide Scope of Analysis Pane** .

When you are drilling on a hierarchy, you may discover that you need to drill to a lower level than you previously allowed for when setting the scope of analysis.

10. Press **[Enter]** to continue.

The Scope of Analysis pane displays all of the dimensions that can be drilled down to. If you need to drill deeper into the hierarchy increase the Scope level.

Press **[Enter]** to continue.

11. Click **Close**.
